

Solar Powered LED Lamp with Phone Charger

This solar-powered LED lamp provides sustainable lighting solutions and convenient mobile phone charging. It features a solar panel for energy harvesting, an integrated rechargeable battery, and a bright LED bulb for illumination.

Product Overview

Sustainable Multi-Functional Lighting

This versatile solar-powered LED lamp is an ideal solution for off-grid lighting, camping, and emergency needs. It combines efficient solar energy harvesting with integrated mobile charging capabilities, providing both illumination and power for essential devices. The unit is designed for durability and portability, making it a reliable tool in various environments.

Technical Specifications

Performance Metrics

220 lm

Luminous Flux

10 pcs

LED Count

Solar Panel Power	1.7 W
Panel Voltage	5 V
Battery Capacity	2200 mAh
Mobile Charging Output	5V

Logistics

Packaging and Shipping

Specification	Value
Inner Box Dimensions	18.6cm x 17.5cm x 14cm
Carton Dimensions	57.5cm x 49cm x 39cm
Units per Carton	24 sets
Gross Weight	19.8 kg

Features

Key Capabilities	Solar Powered, Mobile Phone Charger, Dimmable, Off-Grid Ready, Portable
