

Solar Powered LED Pathway Light

This solar-powered outdoor LED pathway light features an integrated solar panel, eliminating the need for wiring. It provides ambient illumination with its vertically oriented LED array and durable, weather-resistant construction.

Overview

Sustainable Outdoor Lighting

This solar-powered outdoor LED pathway light is designed for efficient, autonomous illumination in garden and driveway environments. Featuring an integrated solar panel, it eliminates the need for complex external wiring, offering a sustainable and cost-effective lighting solution. The unit is built with durable, weather-resistant materials to ensure long-term reliability and performance in various outdoor settings.

Technical Specifications

Power Source	Integrated Solar Panel
Light Source	Vertically oriented LED array
Construction	Weather-resistant, Durable

Application & Installation

Recommended Use Cases

- Pathways
- Driveways
- Garden areas

Installation	Yes
