

# Solar Powered LED Street Light

This LED street light is powered by integrated solar panels for sustainable energy use. It provides bright and uniform illumination for street lighting and public spaces.

## Overview

### Solar Powered LED Street Light

This high-efficiency LED outdoor lighting system is engineered for reliable performance in various environments. Featuring a durable pole structure with integrated solar panels, it effectively harvests renewable energy to provide bright, uniform illumination. It is an ideal solution for street lighting, parking lots, and public spaces requiring sustainable and energy-efficient lighting.

## Key Features

### Suitable Applications

Street Lighting, Parking Lots, Public Spaces, Outdoor Lighting

## Technical Details

### Core Components

- Integrated Solar Panels
- Durable Pole Structure
- High-Efficiency LED Fixture
