

Solar Powered Lighting and Charging Kit with LED Lanterns

This is a versatile solar-powered lighting and charging solution. The kit includes LED lanterns, a solar panel, and charging adapters, ideal for off-grid lighting and mobile device power.

Product Overview

Versatile Off-Grid Solution

This solar-powered lighting and charging kit provides a reliable, eco-friendly solution for off-grid environments and emergency preparedness. The system includes high-efficiency solar panels that recharge internal batteries, powering multiple LED lanterns for extended use. Designed for versatility, the kit also features a comprehensive set of charging adapters, making it compatible with various mobile devices.

Key Features

Included Components

- Solar panel
- Multiple LED lanterns
- Charging adapter set

Ideal Applications

Off-grid lighting, Emergency preparedness, Outdoor activities, Mobile device charging

Technical Details

Power Source

Solar Energy

Model Identifier

CS-SLS
