

Solar Powered Motion Sensor Security Light

This solar-powered security light provides efficient and reliable outdoor lighting. It features a separate solar panel for optimal sunlight capture and an adjustable LED light head with a motion sensor for enhanced security.

Product Overview

Solar Powered Motion Sensor Security Light

This solar-powered security light provides efficient and reliable outdoor lighting solutions for residential and commercial applications. It features a versatile, adjustable LED light head paired with a high-efficiency remote solar panel to ensure optimal sunlight capture. Designed for safety and deterrence, the unit automatically illuminates when motion is detected, providing high-visibility brightness exactly when it is needed most.

Technical Specifications

Primary Application

- Residential Security
- Commercial Perimeter Lighting
- Safety Lighting
- Intruder Deterrence

Power Source	Solar Energy
Key Features	Motion Sensor, Adjustable Head, Solar Powered, Weather Resistant

Installation

Included Hardware	Yes
Installation Type	Wall-mounted with included bracket
