

Solar Powered Outdoor Charging Station with LED Lighting

This outdoor fixture provides LED lighting powered by a solar panel. It also functions as a charging station for electronic devices.

Product Overview

Sustainable Outdoor Power & Lighting Solution

This solar-powered outdoor station integrates efficient energy harvesting with functional LED lighting, designed for modern urban environments. The unit features a sleek, durable design with a top-mounted solar panel and built-in connectivity for charging electronic devices. It serves as a dual-purpose infrastructure piece, providing reliable illumination and power access while utilizing renewable energy.

Technical Specifications

Power Source	Solar Energy
Lighting Technology	Integrated LED
Charging Connectivity	Yes

Design & Construction

Form Factor	Modern Rectangular with Rounded Edges
Finish Color	Silver
Key Features	Solar Powered, LED Lighting, Device Charging, Outdoor Rated
