

Solar Powered Outdoor Pendant Light

This solar-powered pendant light is designed for outdoor use, providing illumination without the need for electrical wiring. It features a solar panel that charges during the day and an LED light that automatically turns on at dusk.

Product Overview

Solar Powered Outdoor Lighting Solution

This solar-powered pendant light is an ideal, energy-efficient solution for illuminating outdoor spaces such as sheds, patios, and gazebos. By utilizing a standalone solar panel, the unit charges its internal battery throughout the day to provide automatic dusk-to-dawn illumination without the need for complex electrical wiring. Its classic design and included remote control offer both aesthetic appeal and convenient operation for professional and residential applications.

Technical Specifications

Model Number	DR-0427E
Power Source	Solar Energy

Features
