

Solar-Powered Outdoor Wall Light

This solar-powered outdoor wall light provides efficient and eco-friendly illumination. It charges during the day and turns on at dusk, enhancing safety and security without wiring.

Product Overview

Eco-Friendly Outdoor Illumination

This solar-powered outdoor wall light provides efficient and sustainable lighting for various exterior environments. Designed for reliability, the unit automatically charges via integrated solar panels during daylight hours and activates at dusk. Its weather-resistant construction ensures durability across seasons, making it an ideal choice for enhancing security and visibility in gardens, pathways, and patios without the need for complex wiring.

Technical Specifications

Power Source	Solar energy
Operating Logic	Automatic dusk-to-dawn sensor

Design and Build

Mounting	Adjustable mounting bracket
Weather Resistance	Yes

Features

Key Benefits

- Zero electricity costs
- Wireless installation
- Durable construction
- Flexible positioning

Application

Typical Applications	Pathways, Gardens, Patios, Perimeter Security
