Product Overview

Sustainable Outdoor Illumination

This high-efficiency solar-powered LED wall light is an eco-friendly and cost-effective solution for illuminating gardens, pathways, and entryways. Featuring an integrated solar panel, it harvests sunlight to charge its internal battery, enabling automatic activation at dusk without the need for external wiring. Its durable, weather-resistant construction ensures reliable performance and longevity in various outdoor environmental conditions.

Technical Features

Key Features

- Automatic dusk-to-dawn activation
- Wire-free installation
- Energy-saving LED technology
- Weather-resistant housing
- Sustainable solar energy harvesting

Power Source	Solar Powered, Rechargeable Battery
Installation Type	Wall or fence mounted with screws

Performance

Efficiency Level

High Efficiency • Low Energy Consumption
