

Solar-Powered Outdoor Wall Light with Motion Sensor

This solar wall light provides energy-efficient lighting for outdoor spaces. It uses a built-in solar panel to charge during the day and automatically activates its LED array at dusk, with a motion sensor that increases brightness upon detecting movement.

Product Overview

Solar-Powered Outdoor Wall Light

This solar-powered wall light offers a highly efficient and sustainable solution for outdoor illumination. Designed for pathways and gardens, the unit features a high-performance integrated solar panel that powers the LED array. With an intelligent motion sensor, the brightness increases automatically upon detection, providing enhanced security while maximizing battery life.

Key Features

Features

Solar Powered, Motion Sensor, Weather Resistant, Automatic Dusk Activation, Energy Efficient

Technical Specifications

Primary Applications

- Pathways
- Gardens
- Outdoor Security
- Building Exterior

Power Source

Integrated Solar Panel

Sensor Type

Motion-activated
