Overview

Solar-Powered Surveillance Solution

This wireless IP camera is designed for robust outdoor security, featuring a fully autonomous solar-powered system that eliminates the need for complex wiring. Equipped with advanced motion detection and high-quality two-way audio, it provides reliable 24/7 monitoring even in challenging weather conditions. With support for remote viewing across multiple devices and local storage options, it offers a versatile and scalable surveillance solution for professional environments.

Technical Specifications

Ingress Protection Rating

IP66

Chipset

Hi3518EV200

Sensor Type

1/3" F23 Low Illumination CMOS

Infrared Night Vision Range

15 m

Micro SD Card Support

64 GB

Operating Temperature

-30 to +75

Power & Connectivity

Connectivity

- WiFi
- AP Hotspots (Direct Connection)

Power Supply

Solar Panel, 4x 18650 Batteries, DC 5V 1A (Micro USB)

Key Features

Surveillance Capabilities

4 pcs

IR LEDs

1 Noise Cancelling

Two-Way Audio

Physical Dimensions

Unit Dimensions

Dimension	Value	Unit
Width	136	mm
Height	105	mm
Total Length (with bracket)	230	mm
