

# Solar Powered Personal Air Purifier

This compact air purifier uses solar energy to operate its internal fan and filtration system. It is designed to remove dust, pollen, and other airborne particles in cars, offices, and small rooms.

## Product Overview

### Sustainable Personal Purification

The YQ-008A is a compact, eco-friendly air purification device engineered for personal environments such as vehicles, offices, and small rooms. By utilizing integrated solar technology, it provides an energy-efficient way to maintain air quality by removing dust, pollen, and other airborne particles. Its portable design ensures you can improve your immediate breathing space sustainably and effectively wherever you go.

## Technical Specifications

Power Source	Solar Energy
Filtration System	Multi-layer filter
Recommended Usage	Car, Office, Small Room
