

Solar Powered Plastic Path Light

This compact path light is powered by an integrated solar panel. Constructed from durable plastic, it provides ambient lighting for pathways and steps.

Product Overview

Solar Powered Path Lighting

This compact, solar-powered chock light is engineered for efficient outdoor illumination without the need for external wiring. Constructed from durable, weather-resistant plastic, it harnesses solar energy to provide reliable ambient lighting for pathways and steps. It represents an ideal sustainable solution for professional landscaping and safety illumination projects.
