

Solar Powered Shed Light with Motion Sensor

This solar-powered shed light illuminates sheds, garages, and other outdoor spaces without electrical wiring. A PIR motion sensor automatically activates the light when movement is detected.

Product Overview

Versatile Solar Lighting

This solar-powered shed light provides a reliable and wire-free illumination solution for outdoor structures like sheds and garages. Utilizing a separate solar panel to charge an internal battery, the system ensures energy-efficient operation without external power requirements. The integrated PIR motion sensor offers enhanced security and convenience by activating the bright LED source automatically upon detecting movement.

Technical Specifications

Light Source	LED
Sensor Technology	PIR (Passive Infrared)
Housing Material	Durable Plastic

Performance & Features

Adjustable Settings

- Motion sensitivity
- Light duration
- Manual On/Off switch

Performance Metrics

1 meters

Motion Detection Range

Key Features

Solar Powered, Motion Activated, Weather Resistant, Energy Efficient
