

Solar Powered Stainless Steel Chock Light

This solar-powered chock light features stainless steel construction. The light is designed for outdoor use, utilizing a solar panel to charge during the day and provide illumination at night.

Product Overview

Solar Powered Stainless Steel Chock Light

This solar-powered chock light features a robust stainless steel construction, ensuring durability for various outdoor environments. By utilizing a highly efficient solar panel to charge the internal battery during daylight hours, it provides reliable illumination automatically at night. The compact, triangular design makes it an ideal solution for enhancing safety and aesthetics on pathways, steps, and general landscapes.

Technical Specifications

Housing Material	Stainless Steel
Energy Source	Integrated Solar Panel
Design Features	Triangular profile, Compact, Weather-resistant

Application

Recommended Use

- Pathways
- Steps
- Landscape Lighting
