

Solar Powered Ultrasonic Pest Repeller

This solar-powered pest repeller uses ultrasonic waves to deter rodents and other burrowing animals. The device is designed for outdoor use and features a solar panel and LED light.

Product Overview

Eco-Friendly Ultrasonic Pest Control

This solar-powered pest repeller is a sustainable solution for protecting gardens and lawns from burrowing rodents. By emitting ultrasonic waves and vibrations, it creates an inhospitable environment for pests, encouraging them to relocate without the use of chemicals or traps. The device is durably constructed to be weather-resistant, ensuring reliable performance in various outdoor conditions.

Key Features

Device Attributes	Solar Powered, Ultrasonic Emission, Weather Resistant, LED Light, Ground Insertable
-------------------	---

Technical Details

Functionality	Ultrasonic waves and ground vibrations
Integrated Lighting	Yes
Aesthetic Design	Sunflower motif
Energy Type	Rechargeable solar power
