

Solar Powered Water Pump

This high-performance solar water pump is designed for efficient water extraction. It features a robust stainless steel construction for durability and corrosion resistance.

Product Overview

Sustainable Water Extraction

This high-performance solar water pump is engineered for reliable water extraction in remote locations where grid power is unavailable. Featuring a durable, corrosion-resistant stainless steel construction, it provides a long-lasting and sustainable solution for diverse environments. The unit is optimized for seamless integration with solar panel systems, offering an energy-efficient and cost-effective method for agricultural, residential, and industrial water needs.

Technical Specifications

Model Identifier	TPS1200-HR
Construction Material	Stainless Steel

Features

Primary Advantages

- Solar-powered energy optimization
- Corrosion-resistant construction
- Ideal for remote location deployment
- Suitable for agricultural, industrial, and residential use

Compliance

Industry Applications

Agricultural • Residential • Industrial
