

Solar Submersible Water Pump

This submersible pump is designed for efficient water extraction using solar power. It is ideal for deep well pumping, irrigation, and remote water supply systems.

Product Overview

Solar-Powered Water Extraction

This high-performance solar submersible pump is designed for efficient water extraction across a variety of demanding environments. Engineered for optimal solar power utilization, it offers an eco-friendly and cost-effective solution for deep well pumping, irrigation, and remote water supply systems. Its robust construction ensures long-lasting operation and reliable water delivery with minimal maintenance requirements.

Technical Features

Design Advantages

- Low voltage operation
- Ultra-strong overload protection
- Multi-impeller string design
- Short-term dry-run capability

Operational Status

Energy-Saving, Healthy, Robust Construction

Compliance and Safety

Safety Warnings

Read WARNING labels • See manual for (caution) instructions
