Product Overview

Professional Solder Connection Valve

This build-in valve is engineered for reliable performance in both hot and cold water plumbing and HVAC systems. Designed with a durable metal body and brass valve components, it ensures long-term operational stability and precise flow control. The versatile design supports soldering connections, making it an ideal choice for professional industrial and residential installations.

Technical Specifications

Model Specifications

Model Code	Size
Y00054	15mm
Y00055	18mm
Y00056	22mm

Suitable Applications

Hot Water Systems • Cold Water Systems • HVAC Systems • Industrial Plumbing

Materials	Metal Body, Brass Valve
Connection Method	Soldering

Manufacturing Standards

Manufacturing Excellence

- 20 years of industry manufacturing expertise
- Large-scale production capabilities
- Green manufacturing processes
- Guaranteed quality and cost efficiency
