

Solder Wire - Tin and Aluminum Alloy

This solder wire is manufactured with imported Malaysian tin and aluminum alloy in precise proportions. It offers excellent soldering performance, creating bright and full solder joints while producing low residue.

▲ 此種錫絲規格繁多，均選用優質的進口(馬來西亞)錫及鉛合金按比例要求生產，錫、鉛含量比例標準，合理產品多項指標，是您生產的首選。

■ 優點

- ◆ 良好的焊接效果：光亮、平滑飽滿。
- ◆ 殘留物低，焊接時不會濺掛松香。
- ◆ 絕緣電阻高，線內松香分布均勻。
- ◆ 無惡臭味，無毒害健康之氣體。

Product Overview

High-Performance Solder Wire

This high-quality solder wire is crafted using premium imported tin and aluminum alloy, blended in precise proportions to ensure consistent performance. Designed for electronics assembly and repair, it delivers bright, smooth, and full solder joints with minimal residue. The wire features uniform rosin distribution and high insulation resistance, ensuring a safe and reliable soldering process without harmful odors or gases.

Technical Specifications

Key Features

- Low residue production
- No rosin spatter
- High insulation resistance
- Uniform rosin distribution
- Odorless operation

Material Composition

Tin, Aluminum Alloy
