

Solderless PAL Female Connector

This is a solderless PAL female connector. It is used for connecting coaxial cables in video or antenna applications, allowing easy cable termination without soldering.

Product Overview

Solderless PAL Female Connector

This PAL female connector is designed for reliable coaxial cable termination in video and antenna applications. Its solderless design allows for quick and efficient installation, eliminating the need for specialized soldering equipment. The connector features a durable metal construction with an insulating sleeve, ensuring a secure and stable connection for professional signal transmission.

Technical Dimensions

Diameter	12 mm
Total Length	32.5 mm

Features

Connection Method	
Solderless	
Gender	Female
Standard	PAL
