

Solenoid Valve for Fuel Dispensing

Solenoid valve designed for gasoline and gas pump applications. It features a robust brass body, dual solenoid actuators, and durable electrical connections.

Overview

High-Performance Fuel Dispensing Solution

This professional-grade solenoid valve is engineered specifically for gasoline and gas pump applications. Featuring a robust brass construction and dual solenoid actuators, it ensures reliable and precise fuel flow control in demanding industrial environments. The design prioritizes durability and consistent performance for high-frequency dispensing systems.

Technical Specifications

Body Material	Brass
Actuator Type	Dual Solenoid
Application Suitability	Gasoline Dispensing, Gas Pump Systems, Industrial Fuel Control

Electrical Ratings

Electrical Features

- Voltage regulated
- High-efficiency coil
- Standardized power connection

Compliance

Origin

Made in China
