

Solid Core Electrical Cable

This is a solid core electrical cable. It is designed for internal wiring in electronic equipment and appliances.

Product Overview

Professional Solid Core Electrical Cable

This high-quality solid core electrical cable is designed for reliable power distribution in professional and industrial installations. Engineered for consistent performance, it provides excellent conductivity and durability for long-term usage. Its solid core construction ensures stability and ease of installation in fixed wiring environments.

Technical Specifications

Compatible Environments

- Indoor fixed wiring
- Conduit installations
- Cable trunking
- Industrial panels

Conductor Construction	Solid Core
Certifications and Compliance	ISO Certified, RoHS Compliant, CE Marked

Performance Metrics

Core Performance

1000 V

Voltage Rating

90 °C

Max Operating Temp
