Product Overview

High-Performance Solid Polyurethane Wheels

These solid polyurethane wheels are engineered for long-term durability and maintenance-free performance, eliminating the risk of flats associated with pneumatic tires. Designed for versatile use in garden carts, wheelbarrows, and industrial tool carts, they feature a robust construction with high-strength hubs. With over 100 variations ranging from 8 to 16 inches and an annual capacity of over one million units, these wheels provide a reliable solution for demanding environments.

Technical Specifications

Available Colors

- Black
- Red
- Yellow
- Blue
- Green

Available Sizes

8 inches to 16 inches

Material Composition

Polyurethane, Steel Hub

Logistics and Capacity

Annual Production Capacity

1100000 Units

Annual Supply

Applications

Industry Applications

- Garden Carts
- Wheelbarrows
- Tool Carts
