

Solid Resilient Forklift Tire 28x9-15

This solid tire is designed for forklifts and other industrial vehicles. It features a durable rubber compound for enhanced wear resistance and stability.

Product Overview

Industrial Performance

This solid resilient tire is engineered specifically for forklifts and heavy-duty industrial vehicles. It features a specialized durable rubber compound designed to provide superior wear resistance and operational stability in demanding environments. Built for high load capacity and puncture resistance, this tire ensures consistent safety and performance during intensive material handling tasks.

Technical Specifications

Tire Size	28x9-15
Recommended Rim Size	7 inch
Tire Type	Solid Resilient

Features

Key Features	Puncture Resistant, Wear Resistant, High Load Capacity, Rim Guard, Industrial Grade
