

Sonic Silicone Facial Cleansing Device

This facial cleansing device is made with skin-friendly silicone and is suitable for sensitive skin. It utilizes micro-vibration technology to provide a deeper clean and massage effect, featuring different sized nodes to clean various facial zones.

Product Overview

Professional Sonic Cleansing

This sonic facial cleansing device is crafted from skin-friendly silicone, making it suitable for all skin types, including sensitive skin. Its ergonomic design ensures a comfortable grip, while advanced micro-vibration technology provides a deep, effective clean. With waterproof capabilities and adjustable intensity levels, it offers a customizable skincare experience for daily use.
