

# Sound and Heat Insulation Material

Sound and heat insulation material provides thermal regulation and noise reduction for buildings. It enhances energy efficiency and creates a more comfortable indoor environment.

## Product Overview

### Professional Energy Measurement

This single-phase, two-wire electricity meter is designed for precise energy consumption monitoring in residential and light commercial environments. Engineered to meet international IEC standards, it ensures reliable performance and class 1.0 accuracy for billing or auditing purposes. Its robust construction and clear display allow for simplified integration into standard indoor electrical setups.

## Technical Specifications

### Current Rating

**5 A**

Base Current

**30 A**

Maximum Current

Meter Type	Single-phase two-wire
Accuracy Class	Class 1.0 (IEC 62053-21)
Rated Voltage	240 V
Frequency	50 Hz
Pulse Constant	600 imp/kWh

## Compliance and Usage

International Standards	IEC 62053-21, Class 1.0
Installation	Indoor
