Overview

Smart Lighting Control

This sound and light sensor lamp base offers an automated energy-saving solution for residential and commercial environments. By integrating sound and ambient light detection, it ensures hands-free illumination for areas like corridors, basements, and warehouses. Its durable construction and universal compatibility make it an ideal choice for modern, efficient lighting upgrades.

Technical Specifications

Operating Voltage	265 V
Frequency	50 Hz
Housing Material	PP (Polypropylene)

Certifications

Regulatory Standards	CE, ROHS, MSDS
