

Sound Dampened Diesel Generator

This sound-dampened diesel generator features a direct fuel injected intake system. Its force air convection cooling system and composite steel fan cover minimize noise levels.

Product Overview

Industrial Grade Silent Diesel Power

This sound-dampened diesel generator is engineered for reliable, high-performance power generation in environments where noise control is critical. Featuring a robust diesel engine and a soundproof enclosure, it provides consistent output while minimizing operational disturbance. The unit is equipped with a comprehensive control panel including AC and DC outputs, along with integrated safety features like circuit breakers and oil alerts to ensure long-term durability and operator safety.

Technical Specifications

AC Output Voltage	220V - 230V
DC Output	12V / 8.3A
Frequency	50 Hz

Capacity and Maintenance

Motor Oil Refill Requirement	1.65 L
Diesel Fuel Refill Requirement	15 L

Safety and Features

Operational Safety Guidelines

- Operate engine outdoors only
- Ensure proper ventilation during charging
- Keep away from sparks and flames
- Avoid operation in enclosed areas to prevent carbon monoxide poisoning
- Check engine after 20 hours of runtime

Key Features

Soundproof Enclosure, Portable Wheels, Voltmeter, Circuit Breaker, Oil Alert System
