

Sound Dampened Diesel Generator

This sound-dampened diesel generator provides reliable power with reduced noise. It features a robust enclosure for sound dampening and weather protection.

Product Overview

Industrial Sound Dampened Diesel Generator

This sound dampened diesel generator is engineered for reliable, quiet power output in environments where noise control is critical, such as residential zones, hospitals, and active construction sites. Built on a heavy-duty steel base frame with integrated vibration dampeners, this unit ensures stable operation and long service life. The system comes complete with advanced filtration and a 24V electric start system for immediate, dependable deployment.

Technical Specifications

Insulation Class	H
IP Rating	IP21/22
Cooling System Temperature	50
Fuel Tank Run Time	8 hours

Key Features

Standard Equipment

- Brand-new engine with CE certificate
- Brushless alternator
- Heavy-duty steel base frame
- Vibration damper system
- Industrial silencer
- Air, oil, and fuel filtration system
- 24V battery and charger

Compatible Controllers

Deepsea • DEIF • ComAP • Woodward

Available Upgrades & Options

Automatic Transfer Switch, ABB/Schneider Breaker, Water/Lub-oil Heater, Fuel Level Sensor, Water-Fuel Separator, Advanced Controller Options
