Product Overview

Professional Marine Acoustic Solutions

These soundproof marine panels are engineered for ship interiors, providing a modular, high-performance solution for noise reduction and thermal insulation. The system utilizes a durable, multi-layered construction featuring either rockwool or aluminum honeycomb cores to ensure both structural integrity and acoustic comfort. Designed for ease of installation, the panels offer a seamless, professional finish suitable for demanding marine environments.

Technical Specifications

Certifications

B-15 • B-0 • IMO Certified

Core Materials

Rockwool, Aluminum Honeycomb

Installation & Design

Installation Features

- Modular design system
- Interlocking edge profiles
- Vertical joint reinforcement
- Easy customization

Primary Application

Interior ship environments
