

Soy Milk Maker with Digital Display

This kitchen appliance is designed for producing fresh soy milk at home. It features a stainless steel interior and a yellow plastic exterior, along with a digital display for selecting functions.

Product Overview

Fresh Plant-Based Milk at Home

This versatile soy milk maker is designed to streamline the production of fresh, homemade plant-based milk. Featuring a robust stainless steel interior and a durable exterior, it combines a built-in heating element with an efficient grinding mechanism. The intuitive digital display allows for precise control, making it simple to prepare a variety of beverages including soy, almond, and rice milk.
