

Soy Milk Maker with Stainless Steel Body

This soy milk machine is designed for producing fresh soybean milk. It features a stainless steel body with green plastic accents and a control panel with indicator lights and buttons for operation.

Product Overview

Professional Soy Milk Maker

This high-capacity soybean milk machine is designed for efficient, daily production of fresh plant-based beverages. Constructed with a durable stainless steel body, it combines robust heating and blending power to ensure high-quality extraction. With its 1.6L capacity and intuitive control panel, this appliance is an ideal solution for home kitchens looking for a reliable, convenient way to process soybeans.
