

Spa and Hot Tub Electric Water Heater

This electric water heater is designed for use in spas and hot tubs. It provides efficient and reliable heating to maintain the desired water temperature.

Overview

Professional Spa & Hot Tub Heating

This electric water heater is engineered specifically for spas and hot tubs, ensuring efficient and reliable temperature maintenance. Designed with durability in mind, the unit incorporates critical safety features to prevent electrical shock. It is an ideal solution for hydrotherapy bath installations, requiring professional setup to ensure optimal performance and safety.

Safety & Installation

Installation Requirements

- Requires Ground Fault Circuit Interrupter (GFCI) protection
- Mandatory grounding required
- Installation must be performed by a qualified service representative
- Suitable for hydrotherapy bath installation

Safety Compliance

GFCI Protected • Hydrotherapy Certified • Professional Installation Required
