

Speaker and Buzzer Gasket

This gasket is designed for use in speakers, trumpets, and buzzers. The composite material ensures a tight seal, preventing air leaks and optimizing sound quality.

Product Overview

Precision Audio Gasket

This durable composite gasket is engineered specifically for speakers, trumpets, and buzzers to ensure optimal acoustic performance. By creating an airtight seal, it prevents unwanted air leakage and significantly enhances overall sound quality. The versatile design includes a central opening for the driver and multiple mounting points, making it a reliable solution for various professional audio hardware configurations.

Technical Specifications

Mounting Features

- Central circular aperture for speaker cone
- Multiple peripheral mounting bolt holes
- Rectangular integrated cutout section

Material Composition	Durable composite material
