

Speaker Gasket with Reinforced Ring

This gasket is designed for use with speakers, trumpets, and buzzers. It is constructed from a durable composite material with a reinforced metal ring to ensure a tight seal and prevent leaks.

Product Overview

Professional Acoustic Sealing Solution

This speaker gasket is engineered for reliable sealing in high-performance audio equipment, including speakers, trumpets, and buzzers. Constructed from durable composite and reinforced fiber materials, it ensures optimal acoustic integrity by preventing air leaks and vibrations. The integrated silver-colored metal ring provides enhanced structural support at the inner diameter for long-term durability in industrial and professional applications.

Technical Details

Compatible Equipment

- Speakers
- Trumpets
- Buzzers

Material Type	Reinforced Fiber, Composite Material, Metal Reinforcement
Mounting Pattern	4-hole symmetrical perimeter mount
Reinforced Ring	Yes
