

Speaker Mounting Frame

This speaker frame features a circular design with multiple mounting holes and support structures. The frame is finished with a durable coating for structural support in audio-video products.

General Overview

Professional Speaker Mounting Solution

This speaker mounting frame is precision-engineered to provide robust structural support for audio-video component integration. Featuring a circular design with standardized mounting points, it ensures secure installation and long-term durability. Its specialized dark powder-coated finish offers enhanced resistance to environmental wear, making it an ideal component for professional audio equipment assembly.
