

Speaker Trumpet Buzzer Sealing Gasket

This gasket is designed for sealing speaker, trumpet, and buzzer components. It is constructed from durable metallic material to ensure a tight and reliable seal, preventing leaks and maintaining optimal performance.

Product Overview

Precision Sealing Solution

This high-quality gasket is engineered specifically for sealing speaker, trumpet, and buzzer components in audio-video applications. Constructed from durable metallic material, it provides a tight and reliable seal to prevent leaks and maintain consistent device performance. The robust design includes a square outer shape with a central circular cutout and four mounting holes for secure and accurate installation.

Technical Specifications

Material	Durable metal
Shape	Square with rounded corners
Mounting Holes	4

Application Compatibility

Primary Applications

- Audio equipment
- Video hardware
- Industrial acoustic signaling

Compatible Components	Speaker, Trumpet, Buzzer
