

Spear Point Tungsten Carbide Drill Bit for Tile and Glass

This drill bit is specifically designed for drilling through tile and glass. It features a spear-pointed tip made of tungsten carbide, ensuring clean and accurate holes with minimal chipping or cracking.

Product Overview

Professional Spear Point Drill Bit

This spear-pointed drill bit is expertly engineered for precision drilling in delicate materials like tile and glass. Crafted with high-grade tungsten carbide, the tip ensures clean, accurate holes with minimal risk of chipping or cracking. Designed for versatility, its standard cylindrical shank offers a stable and secure connection for a wide variety of professional and DIY applications.

Technical Specifications

Cutting Material	Tungsten Carbide
Tip Geometry	Spear Point
Shank Type	Cylindrical

Compatibility

Ideal Applications

- Professional construction
- DIY home projects

Compatible Materials	Tile, Glass
