

# Special Shape Infrared Halogen Heat Lamp

This is a special-shaped infrared halogen heat lamp designed for various heating applications. Its unique shape allows for targeted heat distribution.

## Product Overview

### High-Efficiency Infrared Heating

This special-shaped infrared halogen heat lamp is engineered for precise and rapid thermal applications. Featuring a coiled filament enclosed within a high-quality clear quartz glass tube, it provides efficient infrared radiation distribution. Designed with durable ceramic end caps, the lamp ensures reliable electrical connectivity and performance in demanding industrial environments.

## Technical Specifications

Construction Material	Clear quartz glass with ceramic end caps
Filament Type	Coiled filament

## Industrial Applications

Primary Applications	Industrial heating, Plastic welding, Targeted thermal processing
----------------------	--

## Design Features

### Design Advantages

- Special shape for targeted heat distribution
- Rapid heat-up capability
- Durable electrical contacts
- Easy installation
