

Specialized Profile File for Intricate Shaping

This precision file is designed for specialized material removal and shaping tasks. Its unique profile allows access to intricate or hard-to-reach areas.

Product Overview

Precision Shaping Tool

This specialized profile file is precision-engineered for intricate material removal and shaping tasks. Constructed from durable high-carbon steel, it features a unique profile designed to access hard-to-reach areas with ease. The surface is meticulously cut to provide an aggressive yet controlled cutting action, ensuring efficient material removal while maintaining a smooth finish for professional results.

Technical Details

Model Number	NO.QG37002
Material	High-carbon steel

Design Features

Performance Benefits

- Unique profile for intricate areas
- Aggressive yet controlled cutting action
- Efficient material removal
- Smooth finish capability

Handle Design	Ergonomically designed for comfortable grip and precise control
Recommended Users	Toolmakers, Machinists, Hobbyists
