

Speckled Beige Nonmetal Mineral Slab

This nonmetal mineral slab features a speckled texture and beige coloration. Its density and solid composition make it applicable for countertops, flooring, and decorative panels.

Product Overview

Premium Speckled Beige Nonmetal Mineral Slab

This high-quality nonmetal mineral slab features a sophisticated beige base enriched with a distinctive speckled texture. Composed of dense, durable material, it showcases an intricate pattern of brown, white, and off-white inclusions. Its robust construction and versatile aesthetic make it an ideal selection for high-end interior design applications, including countertops, flooring, and decorative paneling.
