

Spherical Frosted LED Bulb

This LED bulb provides efficient and long-lasting illumination. Its spherical shape and frosted white finish diffuse light evenly, creating a soft and ambient glow.

Product Overview

High-Efficiency Spherical LED Solution

This spherical frosted LED bulb utilizes original patented technology to deliver high luminous efficiency with minimal lumen depreciation. Designed with an advanced convection system and a fully enclosed, gas-filled construction, it ensures superior heat dissipation and an extended operational lifespan. The bulb provides uniform 360-degree illumination, offering a flicker-free, soft lighting experience that is gentle on the eyes.

Technical Specifications

Light Distribution	360-degree uniform illumination
Glass Transmittance	92 %
Driver Technology	Constant current driver

Construction & Design

Key Construction Features

- Fully enclosed construction
- Internally filled with inactive gas
- Electrostatic spraying process on glass
- Upper and lower convection design
