

Spherical Roller Bearing

This high-performance spherical roller bearing is designed for demanding applications. Its self-aligning capability compensates for shaft misalignment, reducing stress and extending service life.

Product Overview

High-Performance Spherical Roller Bearing

This robust spherical roller bearing is engineered for demanding industrial applications requiring high radial and axial load capacity. Its advanced self-aligning capability effectively compensates for shaft misalignment, which minimizes internal stress and significantly extends component service life. Constructed from high-quality steel, the design ensures minimal friction, reduced heat generation, and consistent reliability in harsh operating environments.

Technical Features

Key Capabilities

- Self-aligning design
- High radial load capacity
- High axial load capacity
- Low friction operation
- Heat reduction engineering

Suitable Applications

Heavy Machinery, Gearboxes, Pumps, Conveyors

Product Details

Material Grade

High-Quality Steel • Industrial Grade

Model Identifier

KC 4010645301
