

# Spherical Roller Bearing for Coal Grinding Mill

This spherical roller bearing is designed for use in coal grinding mills. It features precision-machined rollers and raceways for smooth operation and extended service life in demanding industrial environments.

## ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Spherical Roller Bearing

This high-performance spherical roller bearing is specifically engineered for coal grinding mill applications. Designed to withstand heavy loads and harsh operating conditions, it features precision-machined rollers and raceways to ensure smooth operation and extended service life. Its robust construction makes it an ideal solution for demanding industrial environments requiring reliable performance.

## Technical Specifications

### Design Features

- Precision-machined rollers
- Optimized internal geometry
- Enhanced lubrication features
- High load capacity

### Model Identifier

23268CAK/W33

### Primary Application

Coal Grinding Mill, Heavy-Duty Industrial, High Load Application
