

Spiral Bulb Sealing Machine

This automatic sealing machine is designed for the efficient and precise sealing of spiral bulbs. It features a robust construction with a control panel.

Product Overview

High-Efficiency Spiral Bulb Sealing

This automatic sealing machine is specifically engineered for the efficient and precise sealing of spiral bulbs in high-volume production environments. Featuring a robust, mechanically driven design with a geared motor, it ensures consistent performance and reliability on the assembly line. The intuitive control panel allows for straightforward operation, making it an essential asset for automated lighting manufacturing facilities.

Technical Specifications

Operation Type	Automatic
Application	Spiral bulb sealing
Construction Features	Robust metal frame, Mechanically driven, Geared motor system

Control & Interface

Control Features

- Indicator lights for status monitoring
- Key switch for secure operation
- Centralized control panel
