

Spiral Duct Forming Machine

This spiral tubeformer is designed for manufacturing spiral tubes. It is suitable for producing ventilation ducts and other spiral-shaped tubing.

Product Overview

High-Efficiency Spiral Duct Production

This industrial spiral duct forming machine is engineered for the high-speed, precision manufacturing of spiral-shaped tubing. Designed with a robust frame and integrated control systems, it is ideally suited for the large-scale production of ventilation ducts and structural spiral components. Its heavy-duty construction ensures reliability and consistency in demanding manufacturing environments.

Technical Features

Manufacturing Features

- Spiral tube formation
- Automated forming rollers
- Integrated coil feeding system
- User-friendly control interface

Industrial Applications

HVAC Ductwork, Ventilation Systems, Spiral Tubing, Industrial Manufacturing
