

Spiral Hose Protector

The spiral protective sleeve offers exceptional abrasion resistance and withstands ultraviolet weathering across a broad temperature range. Its design allows for easy installation without needing to remove connectors or terminals, significantly extending service life and minimizing costly repairs.

Product Overview

Industrial Hose Protection Solution

The spiral protective sleeve is engineered to provide superior resistance against abrasion, environmental weathering, and UV radiation. Its high-density polyethylene construction ensures excellent durability and flexibility in a wide temperature range. The spiral design allows for seamless installation without the need to disconnect hoses, effectively extending service life and minimizing maintenance downtime.

Technical Specifications

Suitable Applications

- Hydraulic Hoses
- Pneumatic Hoses
- Industrial Cables

Material Composition

High-Density Polyethylene (HDPE)

Performance Features

Abrasion Resistant, UV Resistant, Chemical Resistant, Oil Resistant, Flexible

Installation

Yes
