

Spliced Loop Wire Rope Sling

High-strength wire rope slings are fabricated with a spliced loop at each end. The spliced eyes are professionally formed to ensure maximum strength and reliability, conforming to industry safety standards.

Product Overview

Professional Spliced Loop Wire Rope Sling

These high-strength wire rope slings are engineered for demanding heavy-lifting applications in construction, rigging, and industrial environments. Featuring professionally formed spliced eyes at each end, the design ensures maximum strength and consistent reliability during operation. Constructed from galvanized steel, these slings offer essential resistance to corrosion and abrasion, making them a dependable choice for secure load-bearing tasks.

Technical Specifications

Material Composition	Galvanized Steel
Key Features	Galvanized, Corrosion Resistant, Abrasion Resistant, Spliced Loop Ends, Heavy Duty

Compliance and Usage

Safety Compliance

Industry Safety Standards Compliant

Ideal Applications

- Construction
- Rigging
- Industrial Lifting
