

Split Air Conditioner Outdoor Wall Mounting Bracket

This metal bracket is designed for outdoor wall mounting of split air conditioners. It provides sturdy support with rubber pads that absorb noise.

ADDITIONAL IMAGES

Overview

Heavy-duty metal construction designed for reliable outdoor support.

Professional Air Conditioner Support

This durable metal wall mounting bracket is designed for the secure outdoor installation of split air conditioning units. Engineered for reliability, it features a robust sliding design connected by rivets for enhanced strength and easy folding. Integrated rubber vibration dampers effectively minimize operational noise, while the built-in gradienter ensures precise, horizontal installation for every unit.

Technical Specifications

Model Dimensions

Model	Size (mm)	Thickness (mm)
AU450	450x350x800	1.5
AU550	550x350x800	1.8

Features

Rivets Connecting

Rivets connected sliding design is more stronger and easy to fold

The rivets-connected sliding design allows for enhanced strength and easy folding.

Rubber Pads

The rubber vibration damper can absorb noise effectively.

Integrated rubber vibration dampers help absorb noise effectively.

Equip with Gradienter

Once the bubble is in the middle of the gradienter, your bracket is horizontal

Built-in gradienter ensures the bracket is perfectly horizontal during installation.

Key Features

- Rivets-connected sliding design for increased strength and foldability
- Integrated rubber vibration dampers for noise reduction
- Built-in gradienter for accurate leveling
- Durable metal construction for outdoor use
